

WHY HIRE AN IICRC CERTIFIED FIRM?

When it comes to hiring a professional, they are not all created equal. The IICRC certifies and develops certifications and standards for inspection, cleaning and restoration. There are currently more than 50,000 active certified technicians, many with multiple certifications, and more than 5,000 Certified Firms around the world.

Each Certified Firm follows the IICRC Standard of Care to maintain their Certifications.

Each Certified Firm must have Certified Technicians on each job site at all times.

The IICRC partners with many industry organizations who require an IICRC Certified Firm to complete in-home cleaning, inspection, and restoration.

The IICRC maintains a current list of all Certified Technicians and Firms across the country, and continuously monitors each Firm to operate under the IICRC Code of Ethics.
